

# Rivington Green 3 Year Plan

Prepared by: Steven Jones, Parish Council Chairman

6<sup>th</sup> January 2019    Rev 0

Over the last few years Rivington Parish Council have managed to establish a positive cash flow and healthy balance via strong financial management and the attraction of some extra funding. As a result this three year plan has now been developed to help improve the village green.

The three year plan will support:

- 1 The visual amenity of the green
- 2 Encourage biodiversity of the green
- 3 Support improved awareness and knowledge of the village

Below is a “Google maps” image of Rivington Green taken from google in Jan 19

## The Proposals

### 1 The visual amenity of the green

#### Small Village Green

It is proposed to continue the repairs to the small village green wall along the roadside which have suffered continual neglect for a number of years. It is envisaged the wall which is

Unrestricted

approximately 18 inches high will need to be relaid in a mortar bed to varying depths and with the achievement of a level wall surface. Grading of the lawn to the level wall surface will then be made.

The village planters will be painted to ensure they remain in a good condition.

No other visual amenity works are planned for the small village green. The owners of Fisher House could be approached about repairing the wall behind the village information board which has missing coping stones. Note, this isn't the responsibility of the Parish Council to repair the wall.

### **Large Village Green**

The large Village Green will require more extensive work over a number of years which could include:

- Relaying the coping stones to the retaining wall along the length of the roadway
- Grading and levelling various areas of the lawn which will improve it generally under foot and for future village fairs
- Flagpole repair which is seeing a gradual deterioration with paint flaking along its continuous length
- Improvements around the village stocks with potential cleaning and improving underfoot by means of potential general grading or retained stone area
- "Barrel" planters to be assessed if they can be repaired or whether replacements are needed
- A gravel path connecting the far corner of the village green towards the tea room and connecting to the road which finishes at the Unitarian Church entrance. A previous flagstone path here has been lost over the years
- Repair of the wall on Sheep House Lane nearest the Village tea room

## **2 - Encourage biodiversity of the green**

Encouraging bio-diversity is an important aspect of rural life and the Parish Council would like to support this via some small measures on its village green. Current proposals include:

- On the larger village lawn a three feet section along the whole length of the grassed area along the roadway would not be cut and instead some wild flowers will be sown. This will encourage more fauna and flora such as bees, butterflies and other native species in the area
- A "bug hotel" via pallets and bamboo could be created on the smaller village green in the opposite corner to the post box
- Information boards could be created to support this and enable visitors to understand what the Parish council is doing

Fig 4: Pallet bug hotel and wild flower meadows

### 3 - Support improved awareness and knowledge of the village

A lectern style information board is proposed to be placed on one of the village greens to aid with increasing people's awareness and knowledge of the village over the centuries. This information board would contain a "QR code" for more information which could take visitors to the Parish Council Website which has other links and information on Rivington.

In discussions with Groundworks who are working with Rivington Heritage Trust a number of existing lecterns in the Terraced Gardens are being replaced and these or one could potentially be donated to Rivington Parish Council for this purpose. Some small repair work may be required plus the creation of the information board which the Anglican Rivington Church has offered to help with creating.
